VIDEO EXAM TIPS

- Please read the [Video Exam Guide](#) before recording your video exam.
- Sheet Music must be provided for Free Choice Pieces. Examiners will not be able to mark the 'Accuracy' section if there is no music to look at.
- Consider the camera angle:
 - Examiners need to be able to see the drum sticks
 - Both hands need to be in view for guitar/bass/piano/ukulele
 - Avoid awkward camera angles relating to performance attire
- Check the sound balance between instrument and tracks.
- For Video Graded Certificates check the [technical work requirements](#) carefully. There is a document for each instrument you can read that outlines the exact technical requirements for Video Graded Certificates.
- Check the same document to find out the correct use of the click track and metronomes for each technical exercise.
- Sight reading, improvisation, ear tests, quick study pieces, General Musicianship Questions are not required in any video exam (Performance Certificate or Graded Certificate).
- You must play with the backing tracks unless it is a designated solo piece from the Piano or Acoustic Guitar syllabus.
- Only the candidate must be playing. The teacher cannot play along.
- There can be no prompting from the teacher during any part of the video exam.

What to do with your finished video

- We have a new system in 2021 which will be managed by the AMEB Federal office.
- You will receive information from the AMEB office on how to submit your video exam.
